

Flashing Accessories

Product Data

Seaman Corporation provides pre-molded and sheet form non-reinforced accessories to complement the flashing needs for FiberTite Roofing Systems.

DESCRIPTION

These flashing components are manufactured from Seaman Corporation's proprietary compound, utilizing DuPont's™ Elvaloy® KEE (Ketone Ethylene Ester) compound as the principle polymer.

Pre molded KEE pipe flashings are injection molded and designed to accommodate cylindrical penetrations from 1-in up to 6-in in diameter.

Pre-molded universal inside/outside corner flashings are injection molded and designed to accommodate 90° inside or outside wall, curb and other rectangular penetration corners.

The use of pre-molded pipe and corner flashings significantly improves installation consistency and reduces field labor.

Seaman Corporation also provides a 60-mil, non-reinforced KEE membrane to use in roofing applications where the pre-molded components do not accommodate the penetration.

APPLICATION

Seaman Corporation's FiberTite accessory components are formed and/or sealed in place using conventional hot air welding techniques. Consult the most current versions of Seaman Corporation's Guide Specifications for the Installation of FiberTite Roofing Systems and Installation Details for installation requirements, cautions and parameters.

PHYSICAL PROPERTIES

Pre-Molded Pipe Flashing

Material	KEE
Thickness	0.55 in
Packaging	8 ea. per carton

Pre-Molded Inside/Outside Corner

Material	KEE
Thickness	.080 in
Packaging	20 ea. per carton

Non-Reinforced Sheet

Material	KEE
Thickness	.060 in
Packaging	4-ft x 24-ft rolls

*Colors: FiberTite non-reinforced accessory components are stocked in our standard DC196 "off white." Also, most accessory components can be made available in the following additional colors: DC6/white, DC901/energy gray, DC903/patina green and DC261/thermal tan.
